**Geha Mental Health Center, Child and Adolescent Department, Sackler
Faculty of Medicine, Tel Aviv University, Petah Tikva, Israel**

Geha Mental Health Hospital is affiliated to Tel Aviv University.

We have 160 inpatient beds, 3 day care units, and 6 outpatient clinics.

The child Psychiatry Division is the second largest in the world and include services form age 0 to 18 in inpatient adolescent unit, child (3-7 years old) day care and adolescent day care.

We have also specializing clinics such as: infant clinics (0-3), ADHD clinic and psychosomatic clinic.

Our main research is on depression and suicidal behaviour in adolescents both in clinical trials and basic neuroscience (animal models) .

Our labs include molecular biology and genetics in the campus and animal model lab in the adjacent campus.

The Adults division expertise is resistant schizophrenia.

Residents and researchers are most welcome for two weeks of "clinical sniffing" in the child and adolescent division with option to see labs and adult facilities too.
